Preface

Any plants which provide health promoting characteristics, temporary relief or curative properties are known as Medicinal plants. The history of medicinal plant use for treating diseases is probably dates back to the beginning of human civilization. Medicinal plants are used by different nations to increase the immune system, relief pain and cure or provide relief from ailments. They serve as important therapeutic agent and valuable raw material for manufacturing numerous traditional and modern medicine. In many developing countries, traditional medicine is still the backbone of health-care. Even in developed countries, the raw materials for manufacturing essential drugs are extracted from medicinal plants, using its natural properties of healing. Increasingly, more people are turning to herbal remedies, especially for treating minor ailments.

This book presents the Scientific name, Family name, English name, Sinhala name, Sanskrit name, & Tamil name of total 906 medicinal plants. Many of the medicinal plants are found in Sri Lanka, some of the plants are patented from other part of the world.

There is no minimal knowledge required to read this book. Anyhow it is useful for academics, scientists, professionals, clinicians, pharmacist, and researchers. It serves as a quick reference to the names of difference languages of medicinal plants. Further to that, this is beneficial to the students, who study Traditional medicine, Ethno-Pharmacological, Ethno-Botanical, Ethno-Medical, Ethno-Veterinary and Taxonomical education. Authors sincerely hope that this book will be valuable to the people interested in medicinal plants, especially in developing world.

Dictionary of Medicinal Plants - Scientific Names, Family and Selected Vernacular (English, Sinhala, Sanskrit and Tamil) Names

INTRODUCTION

Medicinal plants have been known for centuries and are highly valued all over the world as a rich source of therapeutic agents of medicinal plants for public health care in developing nations [65]. Even today, the WHO estimates that up to 80 percent of the world population still relies mainly on traditional remedies such as herbs for their primary health care [13]. Ahmed et al. mentioned that according to a survey conducted by W.H.O., traditional healers treat 65% patients in Sri Lanka and 80% in India [3]. According to the WHO, around 21,000 plant species have the potential for being used as medicinal plants. Different ethnic and different language speaking peoples are living in Asian countries.

Plants are commonly known by their local names in every part of the world. These local names play a very important role in ethno-botanical study of a specific tribe or region. Local names given to plants by indigenous people in their local dialects often reflect a broad spectrum of information on their understanding of plants. Most often, the local names are given based on some salient features, e.g. appearance, shape, size, habit, habitat, smell, taste, colour, utility, and other peculiar character, etc. of the plants [15]. These practical, meaningful, easily understandable and rememberable local names are disappearing rapidly along with the culture and tradition of the tribal group of Asian countries. As a preliminary step for documentation purpose, Authors were planned to publish this Dictionary of Medicinal Plants with 906 Medicinal plants, its Scientific names, family and common vernacular (English, Sinhala, Sanskrit and Tamil) Names.

Biography of author(s)

Dr. (Mrs.) Sri Ranjani Sivapalan
D.A.M.S (Hon's) (SL), MAcF (SL), PG Diploma in Hospital Management (In.), M'Phil (SL), PhD (In.), Rtd.
University of Jaffna, Sri Lanka.

She was graduated from University of Colombo with Honors in Siddha Medicine. She achieved Master of Philosophy in Siddha Medicine from University of Jaffna and then gained Post Graduate Diploma in Hospital Management from Madurai Kamaraj University. She obtained her Ph.D. in Siddha Medicine from Tanjore University. She is a Scientist awardee from National Science Foundation Sri Lanka and registered as a member of Science and Technology Management Information System. She is a life member of Jaffna Science Association, Sri Lanka. She is one of the reviewer and editor of Wyo Academic Journals – Journal of Medical sciences, and Journal of Biological Sciences. She was a member of Board of Medical Sciences, Faculty of Graduate Studies, and University of Jaffna. Her major research interests are Standardization, and antimicrobial activity of Medicinal Plants and Clinical Research. She is having university teaching experience more than 30 years. In the graduate program, she has taught Research Methodology. She has been supervised Doctor of Philosophy (PhD) and Master's degree candidates. Even though she has been retired from the university service as a Senior Lecturer, continue her service as an external examiner for the Ph.D. and M. Phil, candidates from University of Jaffna, Sri Lanka, and from Dr. M. G. R. Medical University, India. She has authored 52 research articles in the areas of Clinical Research and Medicinal Plants, published in the National and International Journals and received Google Research Citations 163 at this moment.

Dr. (Ms.) Vinotha Sanmugarajah
BSMS (1st Class) (SL), PhD (SL)
University of Jaffna, Sri Lanka.

She is currently working as a Senior Lecturer, Unit of Siddha Medicine, University of Jaffna, Sri Lanka. She received her degree, Bachelor of Siddha Medicine and Surgery (BSMS) with 1st class on 25th March 2005 from University of Jaffna, Sri Lanka. She was awarded of Scholarships under HETC Project, Ministry of Higher Education (2012), Sri Lanka for her Ph.D. Research Degree. She received her Ph.D. in Siddha Medicine on 24th April 2015 from Faculty of Graduate Studies, University of Jaffna. She has ten years research experience and nine years teaching experience in Siddha Medicine related subjects. She is a life member of Jaffna Science Association, Section C, University of Jaffna from 2008. She has published 15 research papers in International Journals and obtained 45 citations at this instant. She presented 21 research findings in different International and National academic conferences and the abstracts were published in the Conference Proceedings. Her research areas include Phytochemical, Physicochemical, Antioxidant, Clinical research and Siddha Medicine. She obtained the Best oral presentation award in the 1st International Congress of the Society for Ethno Pharmacology (ICSE 2014), at Sri Ramachandra University, Porur, Chennai, India. She is a Reviewer in International Journals – SCIENCE DOMAIN International, BMC (BioMed Central) Research Notes, Biomedical and Pharmacology Journal and Current Research in Nutrition and Food Science. She has been reviewed 80 research papers for above mentioned Journals and an evaluator for the thesis of Master of Philosophy in Siddha Medicine.
